

Topic # 2

How do I Find a Location of Interest?

Scenario: How to use one of the MbCDP maps to search for a street address, postal code, or commonplace names.

Tools to Use: The **search bar** located on the top right corner of the map frame.

Instructions: Type the address, postal code or common name into the search bar, and click on the correct suggestion that appears below the search box. If you are searching for a postal code, be sure to maintain a space between the first and last three characters.

Interpreting the Results: Once you select (click on) the correct address, postal code or commonplace suggestion that appears below the search bar, the map will place a pin marker and zoom to the location of the address you are searching for.

Suggestive Search:

Note: You can zoom in and out of the map and the pin marker will stay on the map, but if you use your mouse to pan the pin marker will be removed.

Additional Comments: The geocoding of addresses and postal codes in rural areas of Manitoba may not be as precise as addresses and postal codes within urban areas, such as Winnipeg.
